Education

The British College (Leeds Beckett University) **January 2021 – Sept 2025**

Bachelor of Science in Computer Science

Technical Skills

Languages: Java, Python, TypeScript, Aiken
Technologies/Frameworks:React.js, Next.js, Node.js, Express.js, FastApi, SpringBoot, Supabase
Database Design : MongoDB, MySQL, PostgreSQL
Cloud & Deployment : AWS (CloudFront, EC2, S3), Cloudflare, Docker
Developer Tools: Docker Desktop, Postman, AWS Management Console, Git, GitHub

Experience

Digital Horizons **Jan 2024 – Jan 2025**

Junior Software Engineer

- Developed and maintained enterprise web applications using React, Next.js, Spring Boot, and PostgreSQL, supporting customer workflows and internal operations.
- Automated payroll and inventory processes, reducing manual administrative effort and improving operational efficiency.
- Deployed and managed applications on AWS (EC2, CloudFront) using Docker, ensuring stable and reproducible production releases.

Sireto Technology **Dec 2025 – Present**

Blockchain Engineering Intern

- Worked on kuber-client-js, an open-source npm package used to interact with the Cardano blockchain via Kuber APIs for both mainnet and testnet environments.
- Worked with Hydra, Cardano's Layer-2 scaling protocol, to support high-throughput transaction flows and off-chain settlement experimentation.
- Developed and tested smart contracts using Aiken, focusing on correctness, on-chain validation logic, and safe transaction execution.

Projects

Wealth Management System | *Next.js, Express.js, PostgreSQL, Solidity, Python* **May 2025**

- Developed a full-stack personal finance platform supporting expense tracking, investment monitoring, and savings goals with secure JWT authentication.
- Integrated AI-based financial insights and implemented blockchain-backed transaction verification using Solidity smart contracts.

Cardano Payroll System | *React, Spring Boot, PostgreSQL, Cardano* **Dec 2025**

- Designed and built an enterprise-grade payroll system that automates salary payments using on-chain ADA settlements, eliminating intermediaries and manual reconciliation.
- Built a secure REST backend with JWT-based role access, real-time transaction monitoring, and an immutable audit trail backed by Cardano blockchain.
- Implemented CI/CD pipelines with automated Docker image versioning and deterministic SHA-based rollback support.

Restore Digital Nepal | *Typescript,* Supabase **Sept 2025**

- Built and deployed a mobile-first emergency website within 24 hours to support youth coordination during Nepal's anti-corruption movement.
- Designed a lightweight, high-availability platform capable of handling sudden traffic spikes during a politically critical moment.

Achievements

Harvard University **October 2024**

CS50 Certificate in Computer Science

- Completed Harvard's CS50, a rigorous introduction to computer science covering algorithms, data structures, and web development.
- Gained proficiency in C, Python, SQL, and foundational problem-solving skills applicable across technical domains.
