Education

The British College (Leeds Beckett University) **January 2021 – Sept 2025**
Bachelor of Science in Computer Science

Technical Skills

Languages: Java, Python, TypeScript, Aiken
Technologies/Frameworks:React.js, Next.js, Node.js, Express.js, FastAPI, Spring Boot
Database Design : MongoDB, MySQL, PostgreSQL, Supabase
Cloud & Deployment : AWS (CloudFront, EC2, S3), Cloudflare, Hostinger Docker
Developer Tools: Docker Desktop, Postman, Directus, n8n, GoogleDriveAPI

Experience

Digital Horizons **Jan 2024 – Jan 2025**
Junior Software Engineer

- Developed and maintained enterprise web applications using React, Next.js, Spring Boot, and PostgreSQL, supporting customer workflows and internal operations.
- Automated payroll and inventory processes, reducing manual administrative effort and improving operational efficiency.
- Deployed and managed applications on AWS (EC2, CloudFront) using Docker, ensuring stable and reproducible production releases.

Sireto Technology **Dec 2025 – May 2026**
Junior Blockchain Engineer

- Worked on kuber-client-js, an open-source npm package used to interact with the Cardano blockchain via Kuber APIs for both mainnet and testnet environments.
- Worked with Hydra, Cardano's Layer-2 scaling protocol, to support high-throughput transaction flows and off-chain settlement experimentation.
- Developed and tested smart contracts using Aiken, focusing on correctness, on-chain validation logic, and safe transaction execution.

IT Together **May 2026 – Present**
Software Engineer

- Develop and maintain five production systems using React, Next.js, Node.js, and Directus, handling features, bug fixes, deployments, and production support.
- Manage AWS infrastructure and Hostinger servers, including migrating Churchill's production website from Hostinger to AWS.
- Built internal automation tools for Microsoft Intune device cleanup and ACSC security alert monitoring, reducing manual operational effort.
- Deliver and maintain full-stack solutions for multiple clients, covering development, deployment, integrations, and ongoing support.

Projects

Wealth Management System | *Next.js, Express.js, PostgreSQL, Solidity, Python* **May 2025**

- Developed a full-stack personal finance platform supporting expense tracking, investment monitoring, and savings goals with secure JWT authentication.
- Integrated AI-based financial insights and implemented blockchain-backed transaction verification using Solidity smart contracts.

Cardano Payroll System | *React, Spring Boot, PostgreSQL, Cardano* **Dec 2025**

- Built a blockchain-based payroll system that automates ADA payments with deterministic scheduling and on-chain settlement, eliminating manual processing flows.
- Designed transaction pipelines and reconciliation services to handle asynchronous blockchain confirmations and prevent duplicate payments.
- Implemented secure REST APIs with JWT-based role access, real-time transaction monitoring, and Docker-based CI/CD pipelines for reproducible deployments.

Restore Digital Nepal | *Typescript, Supabase* **Sept 2025**

- Built and deployed a mobile-first emergency website within 24 hours to support youth coordination during Nepal's anti-corruption movement.
- Designed a lightweight, high-availability platform capable of handling sudden traffic spikes during a politically critical moment.

Photography Portfolio & Client Gallery | *Next.js, TypeScript, Express, PostgreSQL, Google Drive API, Docker* **June 2026**

- Built and deployed a CMS-driven portfolio with private client galleries for photo and video delivery for a freelance photographer.
- Integrated Google Drive storage across multiple accounts, with health monitoring and automatic retries.
- Built resumable chunked uploads that made uploads **40**× faster, and cut gallery image size by **99%** with FFmpeg and pre-rendered images.
- Secured the app with encrypted sessions, CSRF protection and rate limiting; covered by 120+ automated tests in GitHub Actions CI.

Achievements

Harvard University **October 2024**

CS50 Certificate in Computer Science

- Completed Harvard's CS50, a rigorous introduction to computer science covering algorithms, data structures, and web development.
- Gained proficiency in C, Python, SQL, and foundational problem-solving skills applicable across technical domains.
